DedSec Art Introduction_

The art style of DedSec's San Francisco cell was created by Sitara Dhawan, the group's artistic genius. DedSec is Sitara's chosen tool to fight back against the corrupt establishment and she's carefully crafting the San Francisco group's branding. She ensures that every one of DedSec's public message is on-point and that every logo packs a punch. Sitara's artistic rebellion could be called edgy, subversive, and colorful - we just call it "hacker motherf*ckery".

Sitara loved old horror movies as she was growing up and watched them all the time. This inspired her to include pulp horror in her DedSec art designs. Horror movies back in the day depicted fears of the time; but now, through her DedSec art, Sitara is applying this concept to our growing unease about mass surveillance and data gathering used against the people.

We encourage you, our DedSec followers, to create your own versions of DedSec art and messaging. This is why we created this Fankit for you.

We invite you to share your DedSec creations on:
